

## 2012 International Energy Conservation Code

**Note: An asterisk at the beginning of a section identifies a new amendment with the 2012 code edition.**

- G. The International Energy Conservation Code adopted by reference in Section 101.4.6, 2012 International Building Code, is hereby amended as follows:
1. Section C&R106.1 (General) is amended by adding the following to said section:

“Any reference to the ICC Electrical Code shall mean the National Electrical Code, as adopted and amended by the City of College Station.”
  2. Section C&R108.4 (Failure to comply.) is amended by inserting the following amounts in the blanks provided at the end of said section:

“twenty-five (\$25.00) in the first blank and two-thousand (\$2,000.00) in the second blank”
  3. Section C&R109 (Board of Appeals) is amended by deleting the section in its entirety.
  - \* 4. Section C402.4.1.2.3 (Building test) is amended by adding an exception:

“**Exception:** Building envelope tightness and insulation installation shall be considered acceptable when the items listed in Table R402.4.1.1, applicable to the method of construction, are field verified. Where required by the code official, an approved party independent from the installer of the insulation shall inspect the air barrier and insulation.”
  5. Section R401.3 (Certificate) is amended by deleting the existing text from said section:

“The certificate shall list the types and efficiencies of heating, cooling and service water heating equipment. Where a gas-fired unvented room heater, electric furnace, or baseboard electric heater is installed in the residence, the certificate shall list “gas-fired unvented room heater,” “electric furnace” or “baseboard electric heater.” as appropriate. An efficiency shall not be listed for gas-fired unvented room heaters, electric furnaces or electric baseboard heaters.”
  6. Section R403.2.1 (Insulation (Prescriptive)) is amended by adding the following to the end of the section:

“Supply ducts in unconditioned attics may have an insulation R-Value of 6 when installed in conjunction with an air conditioner having a minimum SEER rating of 14.”
  - \* 7. Section R402.4.1.2 (Testing) is amended by adding an exception:

“**Exception:** Building envelope tightness and insulation installation shall be considered acceptable when the items listed in Table R402.4.1.1, applicable to the method of construction, are field verified. Where required by the code official, an approved party independent from the installer of the insulation shall inspect the air barrier and insulation.”
  8. Section R403.2.2 (Sealing (Mandatory)) is amended by adding the following to said section:

“3. Visual inspection option: Duct tightness shall be considered acceptable when the items listed below, applicable to the method of construction, are field verified:

Connections:

- a. Seal core to collar with UL listed mastic or at least 2 wraps of UL 181 listed tape .
- b. Secure connection with mechanical clamp placed over the core and tape.
- c. Pull jacket and insulation back over core. Use a mechanical clamp, two wraps of UL 181 listed tape or UL listed mastic to secure insulation.

Splices

- a. Butt two cores together on a 4” length metal sleeve.
- b. Secure core and sleeve with UL listed mastic or two wraps of UL 181 listed tape
- c. Secure connection with 2 clamps placed over the taped core ends.
- d. Pull jacket and insulation back over core. Use two wraps of UL 181 listed tape or UL listed mastic to secure insulation.”

8. Section R403 (Systems) is amended by adding R403.10 to read as follows:

**“403.10 Heating equipment.** Electrical resistance heat may be used as the primary source of heating for residential use not exceeding five hundred (500) square feet in area.”
